Eco-friendly Compostable Sugarcane Tableware

Our sugarcane pulp tabletops are all PFAS-free and they are not only 100% derived from plant fibers but are also tree free, preventing about 100,000 trees from being cut down each year. They have undergone rigorous testing as FDA-approved, and they are water and grease resistant, strong and durable, and microwave-safe.

Eco-friendly Compostable Tableware

Our paper cups are made from high-quality raw pulp, feature a simple and refreshing design that showcases natural beauty. Made from pure, original fiber pulp without any fluorescent processing, so they are environmentally friendly and promote health. In addition, they are designed to prevent water leakage and are able to withstand temperatures as high as 110° C and remain leak-proof for up to 72 hours.

Eco-friendly Compostable Sugarcane Tableware

Our sugarcane bagasse cutlery are made from rapidly renewable sugarcane pulp – a by-product remaining after the juice has been extracted during sugarcane refining (that would otherwise be burned). These cutlery are a more eco-friendly alternative to plastic cutlery as they are made from reclaimed resources.

These are the only available alternative when plastic bans come into effect. With an increased pulp thickness, these cutlery are perfect for hot foods and soups.
